Easy Read: Patient Safety Plan

V1.0 08/06/2026

	This is our Easy Read Patient Safety Plan. This report explains how we learn from mistakes and keep patients safe.
	The whole report is on our website. This is the link to the website if you want to read it **add link here please**
	This plan is for all our staff to follow. This includes nurses, therapists, doctors, and support staff. The plan is also for all our services which are • Adult health services • Adult social care services • Children's services • Speech and Language Therapy • Neurodevelopmental services

Your Healthcare works hard to keep people safe in all the work that we do

Our patients often have difficulty with the following things, so our safety plans include more detail about them

- Skin damage (pressure ulcers)
- Medication errors
- Falls
- Infections

When something goes wrong

- We look at what happened.
- We ask why it happened.
- We learn as a team.
- We make changes.

We work together to do this by having team discussions

We also have meetings called "After Action Reviews"

Sometimes if the incident is serious, we will do a full Investigation

	We also talk to patients and families. Their views really help us improve our care.
	When we have decided what changes need to be made, we make a plan called an "action plan" This tells everyone what they need to improve or do differently We make sure everyone in Your Healthcare knows what changes we need to make After a short time, we go and check that these changes have been made
	Our patient safety plan is very important It makes sure that Your Healthcare is • Keeping patients safe. • Always improving care. • Stopping problems happening again.
